

Conventional

Long Grain

Management & Positioning

- High yielding long grain variety with excellent quality
- Excellent disease package including blast and smuts
- Plant height and stalk strength for lodging resistance and storm tolerance
- Proven field performance
- Uniform grain size and very good miller
- Lower seeding rates than most varieties

Grain Quality

Average Milling	58/69
Chalk	6-8%
Amylose	26%
Grain Size (unmilled)	7.0mm
Grain Size (milled)	6.5mm

Disease Ratings

Bacterial Panicle Blight	MR
Kernel / False Smut	MR
Cercospora	MS
Sheath Blight	S
Blast	MR
Straight Head	(-)
Narrow Brown Leaf Spot	R

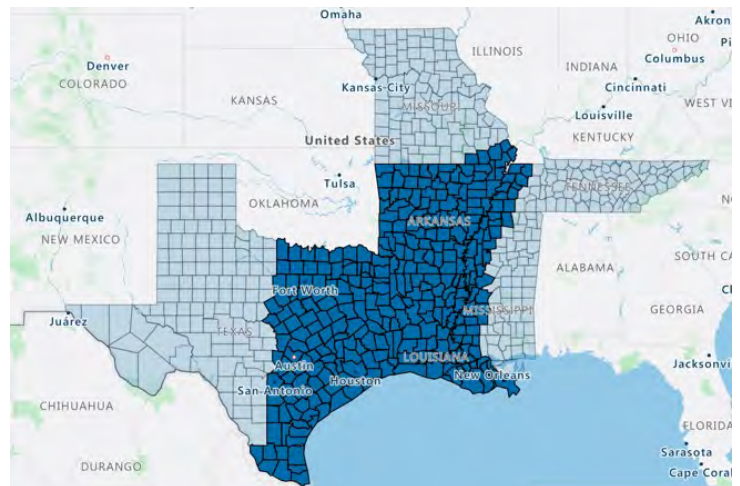

Agronomic Traits

Panicle	Awnless, 9-10"
Plant Height	36"
Lodging	MR
Optimum Planting Date	March 15th - May 15th
Seeding Rate	45-65 lbs./Acre
Average Seeds per Pound	17500
Nitrogen Recommendation	150-180 lbs. /Acre

Zone of Adaptation

AR, MS, MO, TX & LA

Before opening a bag of seed, be sure to read, understand and accept the stewardship requirements, including applicable refuge requirements for insect resistance management, for the biotechnology traits expressed in the seed as set forth in the Technology/Stewardship Agreement that you sign. By opening and using a bag of seed, you are reaffirming your obligation and agreement to comply with the most recent stewardship requirements.

Ratings Key: 9=Excellent, 5=Average, 1=Poor; HR=Highly Recommended, R=Recommended, N=Not Recommended, n/a=Testing not complete.
