

Med-Full

Harvest or Graze at Anytime

Management & Positioning

• Late maturing sorghum sudan hybrid that allows for a wider window harvest of higher quality forage

- Higher yields and digestibility than conventional sorghum sudan hybrids
- Fullgraze II has excellent tillering, recovery, and regrowth after cutting
- Wide range of adaptation because of its very high quality forage and drought resistance
- High green leaf retention, produces high RFV forage. Do Not Feed To Horses
- Can be planted anywhere harvest whenever you want and as often as you want!
- Fullgraze II has shown limited tolerance and ability to recover from Sugarcane Aphid pressure

Precision Placement™ Management

Seeding Rates (lbs./acre)	
Low rainfall on rows	10-15 lbs
Low rainfall on drilled	12-25 lbs
High rainfall / irrigated on rows	15-25 lbs
High rainfall / irrigated on drilled	30-50 lbs
