

Medium Relative Maturity

Hard Red Spring

Management & Positioning

- Hard red spring wheat with explosive yield potential
- Best adapted to the productive soils of Eastern ND and Western MN
- Excellent on Fusarium head scab; the best in Dyna-Gro spring wheat
- A competitive option against other older varieties in the high yield/average protein market

Management Tips

- Plant at 1.2 million seeds per acre, higher seeding rates can cause lodging in this variety
- Consider foliar nutrient applications that could improve protein and/or test weight

Agronomic Traits

Maturity	Medium	Straw Strength	Good
Grain Color	Red	Test Weight	Good
Plant Height	Medium-Tall	Protein	Good
Head Type	Awned	Winter Hardiness	n/a

Agronomic Ratings
