

M57GC29

Early

57 Days to Bloom

92 Days to RM

Management & Positioning

• Early season, cream colored with high yield potential and excellent sugarcane aphid tolerance

• Adapted Eastern Colorado, throughout Nebraska, Kansas, and High Plains Texas as short season cream

- Very uniform, short plant height and appearance, excellent standability: plant on best soils and limited irrigation
- Do not plant deeper than 1.5 inches (has a shorter coleoptile). Plant into soil with good moisture soil profile.

• Plant at a minimum of 50,000 seeds per acre in narrow rows, do not plant in 36" rows

- Remove all trash and residue over the seed bed
- There will be no seed service credits on M57GC29 reduced stand populations

Precision Placement™ Management				
Row Width		Soils:		
Wide	HR	Silt Loams	HR	
15-20"	HR	Sandy	R	
Drilled	HR	Clay	R	
		Poorly Drained	R
