## Early

59 Days to Bloom

### 95 Days to RM

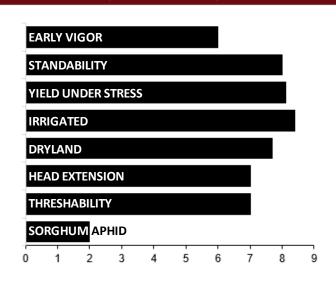

## Management & Positioning

• Attractive early hybrid that produces bronze grain in a semi-open head

- Highest yielding 59 day to mid-bloom hybrid, adapted to high altitude areas
- Well-adapted to both dryland and irrigated production practices
- Excellent yield for maturity with high test weight grain
- Very strong pre-flower stress tolerance and fall standability
- First choice milo for dryland acres in eastern Colorado and northwest Kansas
