

Med-Full Maturity

92 - 110 Days to Soft Dough

Management & Positioning

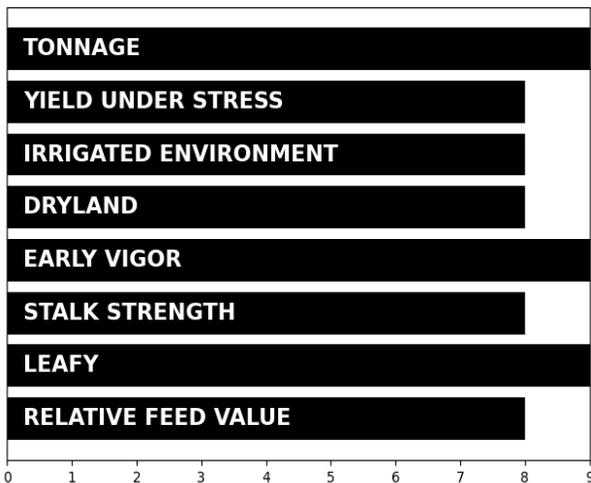

- New male sterile sorgo X sorgo forage sorghum
- Ideal for grazing, hay, haylage, bundle feed, and fall pasture
- Extra sweetness with high sugar content in stalks and leaves
- Works well in most soils under irrigation or dryland conditions
- Fast emergence and growth with an early maturity
- Normal 7-10 foot plant height with very good standability
- Very fine leafy stems which produce excellent feed values
