

Medium-Early Relative Maturity

Soft Red Winter

Management & Positioning

- Unique genetics that are well adapted to the east and mid-south
- A high yield potential variety with stress tolerance
- Exceptional plant health, particularly stripe rust and leaf rust
- Resistant to several biotypes of hessian fly; susceptible to biotype L
- Great southern adaptability but not recommended for low vernalization areas

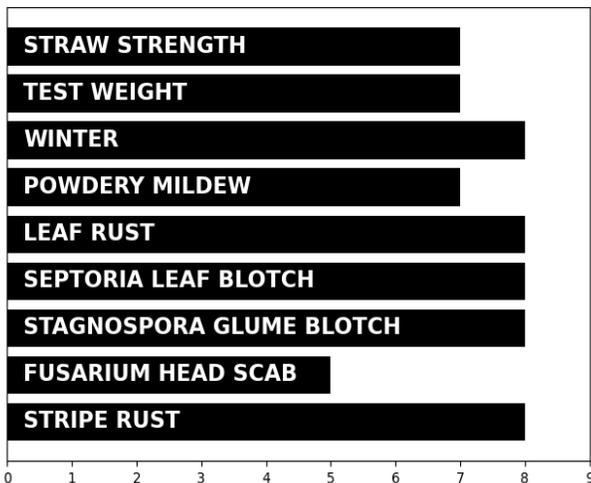

Management Tips

- Plan a fungicide application at flowering to suppress head scab
- An aggressive tillering variety that may be more forgiving in less than ideal planting conditions

Agronomic Traits

Maturity	Medium-Early	Straw Strength	Very Good
Grain Color	Red	Test Weight	Very Good
Plant Height	Medium-Tall	Protein	n/a
Head Type	Awned	Winter Hardiness	Excellent
