

**Medium-Early Relative Maturity**

**Soft Red Winter**

**Management & Positioning**

- A low vernalization variety for the South with newer genetics
- Exciting yield potential combined with good agronomics
- Great ratings for stripe rust and test weight
- Excellent Hessian fly resistance to most biotypes
- Good resistance to soilborne mosaic virus

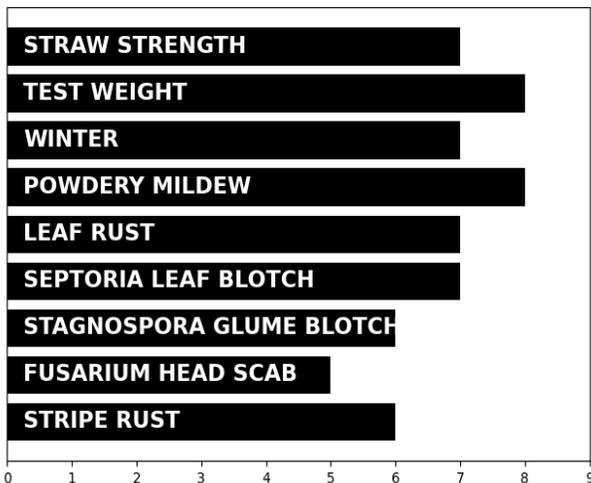

**Management Tips**

- Susceptible to Fusarium head blight, manage with flowering timed fungicides
- Scout and spray for threshold level foliar diseases prior to flowering
